

HELPFUL HYDROGELS

METHOD

- 1** Distribute a set of materials to pairs of team members.
- 2** Challenge them to tear open the diaper and shake out the powdery contents onto a plastic sandwich plate.
- 3** Discover how this hydrogel ingredient makes a diaper so absorbent. Mix it with water to see how much moisture it can hold.

Shake out the small hydrogels from inside.

Note: Unused diapers only.

You will need...

- BABY DIAPERS
- PLASTIC SANDWICH PLATE
- WATER
