Ohio 4-H
Health Officer’s Handbook

Name of Health Officer

Year ___________________________ Age as of January 1 _____________

County ________________________________________________________

Name of Club ___________________________________________________

4-H Advisor Signature ____________________________________________
Make it a Project (optional activity)

Your efforts in this officer position can be turned into a project by completing the requirements for a self-determined project. Every self-determined project requires the 4-H member to identify and complete areas of interest and related activities, learning experiences, leadership/citizenship activities, and a brief report. Just like other projects, self-determined projects can be reviewed and are eligible for fair participation. Learn more about self-determined projects and download the 4-H Self-Determined Project Guide at ohio4h.org/publications.

4-H Health Officer

Welcome

Congratulations on your new role as your 4-H club’s health officer! You have the opportunity to lead activities that will be both fun and educational for your 4-H club. The list of responsibilities for your office as well as activities, ideas, and web sites in this book will help you plan a healthy 4-H club year. Good luck!

An Officer’s Role in the Club

The fourth H in 4-H represents Health. Health is very important to the overall 4-H program. Serving as a club officer means you are part of a team. The team’s responsibility is to hold a club meeting that is both well run and fun. The health officer should also encourage club members to participate in the county Health & Safety Speaking Contest. The officers should meet with their club advisor before each meeting so that they are prepared for the meeting and to help the club make decisions.

Your Role as a Health Officer

As the health officer your role is to plan a health-related activity for each meeting. The activity can be as simple as a roll call where each member responds by announcing their favorite fruit or vegetable, as involved as planning a health demonstration on making a healthy snack, or setting up a speaker to come to your meeting. Lesson plans are available at the Extension Office from your 4-H Educator through the Live Smart Series; whatever you decide, make sure it is well planned and that you have shared it with your advisor and club officers so it is on the meeting agenda. An advisor needs to approve your presentation to make sure it is age and subject matter appropriate for the club.

Get Moving

Did you know that the more TV and video games kids watch and play, the higher the risk of obesity, stress, and illness due to a decrease in running and playing? As the health officer you are a leader. Get your club members up and moving. Exercise reduces stress, improves circulation, improves attitude and helps them feel better about themselves, enhances sleep, improves motivation and makes them better prepared for school work, and helps kids to stay fit. Plan a get-up-and-move activity as often as you can.

My Officer Goals

After reading through this book, develop a plan for what you will do as a health officer this year. Select at least three items from the activities listed below. Feel free to be creative and add your own activities.
<table>
<thead>

Careers to Consider in the Health Field

Dentist
Dietician
Food Scientist, Food Chemist
Food Service Management
Journalist specializing in health and wellness
P.E. Teacher, Health Teacher
School Nurse

Activities

Below are some ideas for activities you can do with your club. These activities range from a two- to three-minute discussion to a program that takes the full time allowed for educational activities.

Roll Call

Have the members respond to roll call by naming favorite exercise, fruit, vegetable, hobby or healthy food.

Guest Speaker or Guest Presentation

Inviting a speaker can add a lot of fun and interest to your club meeting. Ideas for resource people include: self-health, hygiene, hand washing, safe sitting, choking and Heimlich Maneuver, rescue breathing, Deadly Look-a-Likes, Crawl Low Under Smoke, or helmet safety.

Health Speech

Any health-related topic can be turned into a speech. Pick a topic that interests you and present a three- to five-minute speech to your 4-H club. Giving your speech as part of a county speaking contest can be a lot of fun! If you are interested in giving your speech at the county level, check with your advisor or your county office for entry deadlines and a complete set of rules.
Health Demonstrations

Similar to health speeches, demonstrations can be presented at club meetings or at a county level. Demonstrations may include posters, equipment, a PowerPoint slide show, or another type of audiovisual presentation. Below are a few examples of demonstrations you could give.

- Bacteria Blunders
- Bites, Stings, and Blisters
- Halloween Health
- Hand Washing
- Healthy You, Healthy Pets
- I-Pods and Hearing Loss in Kids
- Kid-Proof Your Poisons
- Laugh for the Health of It
- Personal Safety
- Reducing Sports Injuries
- Rethink Your Drink: Hidden Sugars
- Sun Sense
- Tolerance and Disabilities
- Tooth Decay
- Use Your Noodle

Road Trip Fun and Community Resources

- Visit a farm during harvest
- Tour the Health Department: Food Inspector for restaurants or shot clinic, Safe Sitter Program, Helmet Safety, Bike Safety
- Invite a food editor or critic to give a presentation about healthy snacks
- Meet with a School Cafeteria or Hospital Dietician
- Find out about Emergency Management—Rescue Breathing, Choking, Heimlich Maneuver
- Go to the American Red Cross—First Aid in a Can
- Check with the OSU Extension Office—Hand Washing, Food Safety, Food Guide Pyramid
- Visit Fire Departments—Crawl Low Under Smoke, Fire Safety Trailers, Stop-Drop-Roll, Fire Drills
