Here are just a few examples of types of photographic explorations that might be included in this class:

- Select a type of photography (i.e. portrait, wedding, baby, landscape, sports, fashion, etc.) and explore the skills and equipment needed to be successful. Create a portfolio that showcases the type of photography you choose.
- Create a collection of images illustrating a “picture story” or a “documentary” with print or digital images.
- Experiment with a variety of lighting intensities and angles, and apply your new knowledge to your photography.
- Learn to see in “Black and White” and explore how removing color changes the mood, focus of attention, or even attractiveness.
- Use a specialized technique, such as selective focusing or enlarging, to change an image’s focal point, feel, meaning, etc.
- Learn how to use the manual settings on your camera to your advantage (i.e. nighttime photography).

Each participant may bring any extra materials they feel will demonstrate the learning experiences of the current project year, but are not required to do so. **Equipment to view digital images and or portfolios must be provided by the exhibitor. Be aware that Internet/WiFi service will not be available at the judging site!** Images should be contained on your display devices.

Participants in this class are to bring their **589M Photography Master** project books showing involvement in activities and progress made toward completing their 589M Photography Master project. It is not necessary for the exhibitor to have competed in classes J-1, J-2, or J-3 prior to entering this class. Photo editing, photochemical developing, and printing may be done by the exhibitor, and is encouraged.
